

ALISS Sprint 2 update

30 September – 14 October

Technical feature releases and work

- Closed the option to select more than one category.
- Added confirmation to actions to allow the user to understand that the action has been successful.
- Set up feature that allows a front end user to search for all the organisations on ALISS and then suggest an organisation to admin team for entry. It's managed through "unpublished organisation" on admin dashboard.
- Pushed live the feature to filter postcode results by Food, Mental Health, Housing and Homelessness and Money Advice.
- Simplified the workflow around adding and editing organisations and services.
- Developed a visual representation of how ALISS search works as part of ALISS data standards work.
- Reviewed the technical and non-technical considerations around using the OSCR database to add every registered charity in Scotland into ALISS.
- Changed the content on old aliss.org product. Which then opened up further work to update back-end services.
- Provided admin with back-end access to change/add categories.
- Dealt with a number of bugs.
